## Miniature high-voltage soft-recovery rectifier

**BY614**

### FEATURES

- Glass passivated
- High maximum operating temperature
- Low leakage current
- Excellent stability
- Soft-recovery switching characteristics
- Very compact construction.

### APPLICATIONS

- Miniature high-voltage assemblies such as voltage multipliers.

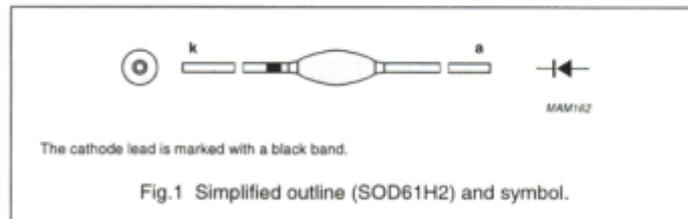

### DESCRIPTION

Miniature glass package, using a high temperature alloyed construction.

This package is hermetically sealed and fatigue free as coefficients of

expansion of all used parts are matched.

The package is designed to be used in an insulating medium such as resin, oil or SF6 gas.

### LIMITING VALUES

In accordance with the Absolute Maximum Rating System (IEC 134).
